Key Assessment Criteria: Being a mathematician (full version)

## A year 1 mathematician

Number and place value

- I can count to and across 100, forward and backwards, beginning with 0 or 1 from any number.
- I can count in multiples of 2,5 and 10 .
- I can count, read and write numbers to 100 in numerals.
- I can say what is one more or one less than any number
- I can read and write numbers from 1 to 20 in numerals and words.
- I can identify and represent numbers using objects and pictorial representation ncluding the number line and use the language of: equal to, more than, less than (fewer), most least

## Calculations

- I can represent and use number bonds and related subtraction facts to 20.
- I can represent and use number bonds and related subtract 1-digit and 2-digit numbers to 20, including facts to
- I can read, write and interpret mathematical statements involving addition, subtraction and equals signs.
- I can solve one-step problems that involve addition and subtraction, using objects and pictorial representations.
- I can solve missing number problems.
- I can solve one-step problems involving multiplication and division, by using concrete objects, pictorial representations and arrays.

## Fractions

- I can recognise, find and name a half of an object, shape or quantity.
- I can recognise, find and name a quarter of an object, shape or quantity.

## Measurement

I can compare, describe and solve practical problems for lengths and heights mass/weight; capacity and volume; and time.
I can measure and begin to record lengths and heights; mass/weight; capacity and volume; and time.
I recognise and know the value of different denominations of coins and notes. I can tell the time to the hour.
I can tell the time to half past the hour.
I can draw hands on a clock face to show these times.

- I can sequence events in chronological order using language.

I recognise and use language relating to dates, including days, weeks, month and years

## Geometry - properties of shapes

I recognise and can name common 2D shapes (rectangles, including squares, circles and triangles.
I recognise and can name common 3D shapes (cuboids, including cubes, pyramids and spheres.

Geometry - position and direction
I can describe position, directions and movement, including half, quarter and three-quarter turns.

Key Assessment Criteria: Being a mathematician (full version)
A year 2 mathematician

Number and place value
I can count in steps of 2,3 and 5 from 0 , and in tens from any number, forward and can read.

- I can compare and numbers to at least 100 in numerals and in words.

I recognise the place valumbers from 0 up to 100 ; using < > = signs.
I can identify, represent and estimate numbers using different representations, including the number line.
I can use place value and number facts to solve problems.

## Calculations

can recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 .
I can add and subtract mentally, including:

- A 2-digit number and ones
- A 2-digit number and te
- Two 2-digit numbers

I can add and subtract numbers using conctan
including:

- A 2-digit number and ones
- A 2-digit number and te

Two 2-digit numbers

- Adding three 1 -digit numbers
check calculations and missing nionship between addition and subtraction and use this can solve problems with addition number problems.
epresentations, including those involving numbers, quantities and measures. can solve problems with addition and subtraction, quanifities and measures.
mental and written methods.
can recall and use multiplication and division facts for the 2,5 and $10 x$ tables, including recognising odd and even numbers.
can calculate mathematical statements for multiplication and division within the
multiplication tables and write them using the multiplication, division and equals signs. can solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in context.
can show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot.
subtraction of one number from another cannot.
I can show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot.

## Fractions

I recognise, find, name and write fractions $1 / 3,1 / 4,2 / 4$ and $3 / 4$ of a length, shape, set of objects or quantity.

- I recognise the equivalence of $2 / 4$ and $1 / 2$.

## Measurement

I can compare and order lengths, mass, volume/capacity and record the results using > and =
can choose and use standard units to estimate and measure length/height in any direction in m and cm using rulers.
choose and use standard units to estimate and measure mass in kg and g using can choose and use standard units to estimate and measure temperature in ${ }^{\circ} \mathrm{C}$ using hermometers.
can choose and use standard units to estimate and measure capacity in l and ml using measuring vessels.
recognise and use symbols for $f$ and $p$ and combine amounts to make a particular value.
can find different combinations of coins that equal the same amount of money. hands on a clock face to show these times,
I can compare and sequence intervals of time
know the number of minutes in an hour.
I know the number of hours in a day.
I can solve simple problems in a practical context involving addition and ssubtraction of money of the same units, including giving change.

## Geometry - properties of shapes

can compare and sort common 2D shapes and everyday objects. can compare and sort common 3D shapes and everyday objects.
and lidentify and describe the properties of 2D shapes, incluaing the number of sides and line of symmetry in a vertical line.
I can identify and describe the properties of 3D shapes including the number of edges, vertices and faces.
Ican identify 2D shapes on the surface of 3 D shapes.

## Geometry - position and direction

can order and arrange combinations of mathematical objects in patterns and
I can use mathematical vocabulary to describe position, direction and movement (including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti clockwise)

## Statistics

I can interpret and construct simple pictograms.
can interpret and construct tally charts.
can interpret and construct block diagrams.
I can interpret and construct simple tables.
I can ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity
I can ask and answer questions about totalling and comparing categorical data.

Key Assessment Criteria: Being a mathematician (full version)

## A year 3 mathematician

Number, place value, approximation and estimation/rounding

- I can count from 0 in multiples of $4,8,50$ and 100
- I can compare and order numbers up to 1,000.
- I can read and write numbers to 1,000 in numerals and words
- I can find 10 or 100 more or less than a given number
- I can recognise the place value of each digit in a 3 -digit number.
- I can identify, represent and estimate numbers using different representations. - I can solve number problems and practical problems using above.

## Calculations

- I can add and subtract mentally, including:
- A 3-digit number and ones
- A 3-digig number and tens
- I can add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction.
- I can estimate the answer to a calculation and use inverse operation to check answers.
- can solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction.
- Ican recall and use multiplication and division facts for the 3,4 and $8 x$ tables. - I can write and calculate mathematical statements for multiplication and division using the multiplication tables, including for 2-digit numbers, using mental and progressing to formal written methods.
- I can solve problems, including missing number problems, involving multiplication and division, including integer scaling problems and correspondence problems in which n objects are connected to m objects.

## Fractions, decimals and percentages

- I can count up and down in tenths.
- I recognise that tenths arise from dividing an object into 10 equal parts and in dividing 1 -digit numbers or quantities by 10
- I recognise and can find and write factions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.
- I can compare and order unit fractions and factions with the sam denominators.
- I can add and subtract factions with the same denominator within one whole. - I can solve problems involving the above.

## Measurement

- I can compare lengths using $\mathrm{m}, \mathrm{cm} \& \mathrm{~mm}$.
- I can compare mass using kg \& g.

I can compare volume/capacity using $\mid$ \& ml .
I can measure lengths using $\mathrm{m}, \mathrm{cm} \& \mathrm{~mm}$.
I can measure mass using kg \& g .

- I can measure volume/capacity using $\mathrm{I} \& \mathrm{ml}$.
- I can add and subtract lengths using m, cm \& mm

I can add and subtract mass using kg \& g .

- I can add and subtract volume/capacity using I \& ml.
- I can tell and write the time from an analogue clock ( 12 hour clock). I can tell and write the time from an analogue clock ( 24 hour clock).
- I can tell and write the time from an analogue clock (Roman numerals).

I can estimate and read time with increasing accuracy to the nearest minute.

- I can record and compare time in terms of seconds, minutes and hours.

I can use the following vocabulary: o' clock, am, pm, morning, afternoon, noon \& midnight.

- I know the number of seconds in a minute
- I know the number of days in each month, year and leap year.
- I can compare the duration of events.
- I can measure the perimeter of simple 2D shapes.
- I can add and subtract amounts of money to give change, using both £ and p in a practical context.

## Geometry - properties of shapes

I can identify horizontal, vertical lines and pairs of perpendicular and parallel lines.
can draw 2D shapes.
I can make 3D shapes using modelling materials.
Irecognise 3D shapes in different orientations and describe them

- recognise that angles are a property of shape or a description of a turn turn.
I can identify whether angles are greater than or less than a right angle.

## Statistics

- I can interpret and present data using bar charts, pictograms and tables. can solve one-step and two-step questions using information presented in scaled bar charts, pictograms and tables.

Key Assessment Criteria: Being a mathematician (full version)

## A year 4 mathematician

Number, place value, approximation and estimation/rounding

- I can count in multiples of $6,7,9,25$ and 1,000 .
- I can order and compare numbers beyond 1,000
- I recognise the place value of each digit in a 4 -digit number.

I can read Roman numerals to 100 and know that over time the numeral system changed to include the concept of zero and place value.
I can identify, represent and estimate numbers using different representations.
I can round any number to the nearest 10,100 or 1,000 .

- I can count backwards through zero to include negative numbers. numbers).

## Calculations

I can add and subtract numbers with up to 4 -digits using the formal written methods of columnar addition and subtraction.

- I can estimate and use inverse operations to check answers in a calculation I can solve addition and subtraction 2-step problems in contexts, deciding which operations and methods to use and why.
- I an recall multiplication and division facts up to $12 \times 12$.
- I can use place value, known and derived facts to multiply and divide mentally, including multiplying by 0 and 1 ; dividing by 1 ; multiplying together three numbers.
- I recognise and use factor pairs and commutativity in mental calculations.
- I can multiply 2 -digit numbers by a 1 -digit number using formal written layout. multiply 2 -digit numbers by 1 -digit, integer scaling problems and harder correspondence problems such as $n$ objects are connected to $m$ objects.

## Fractions, decimals and percentages

- I an count up and down in hundredths. tenths by ten.
| recognise and show using diagrams, families of common equivalent fractions.
- I can add and subtract factions within the same denominator
- I recognise and write decimal equivalents to $1 / 4,1 / 2$ and $3 / 4$.
- I recognise and write decimal equivalents of any number of tenths or hundredths I can round decimals with one decimal place to the nearest whole number
- I can compare numbers with the same number of decimal places up to 2 decimal places. can find the effect of divits in the answer as ones, tenths and hundredths 100 , identifying the a
quantities, including non-unit fractions where the answer is a whole number.
- I can solve simple measure and money problems involving fractions and decimals to 2 decimal places.

## Measurement

- I can compare different measures, including money in $£$ and $p$
- I can estimate different measures, including money in £ and p.
- I can calculate different measures. Including money in £ and $p$.
- I can read, write and convert time between analogue and digital 12 hour clocks.
I can read, write and convert time between analogue and digital 24 hour clocks.
I can solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days.
- I can convert between different units of measurements

I can measure and calculate the perimeter of a rectilinear figure in cm and m . - I can find the area of rectilinear shapes by counting squares.

- I can calculate different measures

## Geometry - properties of shapes

I can compare and classify geometric shapes, including quadrilateral and triangles based on their properties and sizes.

- I can identify lines of symmetry in 2D shapes presented in different orientations. I can complete a simple symmetric figure with respect to a specific line of symmetry
can identify acute and obtuse angles and compare and order angles up to two right angles by size.

## Geometry - position and direction

I can describe movements between positions as translations of a given unit to the left/right and up/down.

- can describe positions on a 2D grid as coordinates in the first quadrant. I can plot specified points and draw sides to complete a given polygon.

## Statistics

I can interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs.
I can solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.

Key Assessment Criteria: Being a mathematician (full version)

## A year 5 mathematician

Number, place value, approximation and estimation/rounding
.$\quad$ I can count forwards or backwards in steps of powers of 10 for any given number up to $1,000,000$.
I can count forwards or backwards in steps of powers of 1 for any 9 .
can determine the value of each digit in numbers le to to $1,0000,000$.
can read Roman numerals to 1,000 (M) and recognise years written in Roman numerals.
can round any number up to $1,000,000$ to the nearest $10,100,1000,10000$ and 100000
I can interpret negative numbers in context, count forwards and backwards with positive and negative hole numbers, including through zero.
practical problems with the above.
Calculations
can add and subbract numbers mentally with increasingly large numbers.
can add and subtract whole numbers with more than a digits, including using formal written methods.
can use rounding to check answers to calculations and determine, in the contextof accuracy.
y. can solve addifion and subtraction multi-step problems in contexts, deciding which operations and can identify multiples and factors, including finding all factor pairs or a number and common factor pairs of fwo numbers.
l use the vocabul
use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers. recognise and use square numbers and cube numbers, and the notation for squared and cubed. rean multiply and divide numbers mentally drawing on known facts.
can multiply and divide whole numbers and those involving decimals by 10,100 and 1000
1 can multiply numbers up to 4 digits by a 1 -digit or 2 -digit number using a formal written method, including long multiplication for 2 -digit numbers. nterpret remainders appropriately for the context
ican solve problems involving multiplication and division including using knowledge of factors and multiples, squares and cubes.
can solve problems involving addition, subtraction, multiplication and division and a combination of hese, including understanding the meaning of the equals sign. problems involving simple rates.
Fractions, decimals and percentages
can recognise mixed numbers and improper fractions and convert from one form to the other I can write mathematical statements $>1$ as a mixed number.
can identify, name and write equivalent fractions of a given fraction, represented visually, including enths and hundredths.
Ican compare and order fractions whose denominators are multiples of the same number. I can add and
same number.
same number.
I can multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.
lian read and write decimal numbers as fractions.
recognise and can use thousandths and relate them to tenths, hundredths and decimal equivalents. can round decimals with 2 decimal places to the nearest whole number and 1 decimal place. 1 can read, write, order and compare numbers with up to 3 decimal places. I can solve problems involving numbers up to 3 decimal places.
| recognise the percent symbol and understand that parcent rel
recognise the percent symbol and understand that percent relates to 'number parts per hundred'. I can solve problems which require knowing percentage and decimal equivalents of $1 / 2,1 / 4,1 / 5,2 / 5,4 / 5$ I can solve problems which require knowing percentage and de
and those fractions with a denominator or a multiple of 10 or 25 .

## Measuremen

- I can solve problems involving converting between units of time
- I can convert between different units of metric measure.

I understand and use approximate equivalences between metric units and common imperial units, such as inches, pounds and pints.
I can measure and calculate the perimeter of composite rectilinear shapes in cm and m .
I can calculate and compare the area of rectangles (incl squares), and including using standard units ( $\mathrm{cm}^{2}$ and $\mathrm{cm}^{3}$ ) to estimate the area of irregular shapes.
can estimate volume and capacity.
I can use all four operations to solve problems involving money using decimal notation, including scaling.

## Geometry - properties of shapes

I can use the properties of rectangles to deduce related facts and find missing lengths and angles.
can distinguish between regular and irregular polygons based on reasoning about equal sides and angles.
I can identify 3D shapes, including cubes and other cuboids, from 2D representations.
I know angles are measured in degrees
I can estimate and compare acute, obtuse and reflex angles.
I can identify angles at a point and one whole turn.

- I can identify angles at a point on a straight line and $1 / 2$ a turn
- I can identify other multiples of $90^{\circ}$

I can draw given angles and measure them in degrees.

## Geometry - position and direction

can identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.

## Statistics

I can complete, read and interpret information in tables, including timetables can solve comparison, sum and difference problems using information presented in a line graph

Key Assessment Criteria: Being a mathematician (full version)

## A year 6 mathematician

Number, place value, approximation and estimation/rounding
I can read, write, order and compare numbers up to $00,000,0000$
I can determine the value of each digit in numbers up to $10,000,000$.
I can round any whole number to a required degree of accuracy.
I can use negative numbers in context, and calculate intervals across zero.
Calculations
can use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.
can solve addilition and subtraction multi-step problems in contexts, deciding which operations and canidentiy and why.
can perffrm mental cacloulations includingliples and prime numbers.
can perform mental calculations, including with mixed operations and large numbers.
lcan multiply multi-digitit numbers up to 4 digits by a 2 digit whole number using the formal written
can divide numbers up to 4 digits by a 2 digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as
I can divide numbers up to 4 digits by a 2 digit number using the formal written method of short division where appropriate.
can solve problems involving addition, subtraction, multiplication and division.
can use my knowledge of the order of operations to carry out calculations involving the four
Fracions, decimals and percentage
I can use common factors to simplify fractions and use common multiples to express fractions in the I can compare and order fractions, including fractions $>1$.
I can add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.
I can multiply simple pairs of proper fractions, writing the answer in the simplest form.
1 can divide proper fractions by whole numbers.
I can associate a fraction with division to calculate decimal fractions equivalents for a simple fraction I can identify the value of each digit to 3 decimal places and multiply and divide numbers by 10,100 and 1000 giving answers up to 3 decimal places.
Can multiply 1 -digit numbers with up to 2 decimal places by whole numbers.
I can use written division methods in cases where the answer has up to 2 decimal places.
I can solve problems which require answers to be rounded to specified degrees of accurac
I can solve problems which require answers to be rounded to specified degrees of accuracy.
I an recall and use equivalences between simple fractions, decimals and percentages, including in I an recall and use equivalences between simple fractions, decimals and percentages, including in
different contexts
Ratio and proportion
I can solve problems involving the relative sizes of two quantities, where missing values can be found using integer multiplication and division facts.
can solve problems involving the calculation of percentages and the use of percentage comparisons. I can solve problems involving similar shapes where the scale factor is known or can be tound.
I can solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.

## Algebra

- I can express missing number problems algebraically.

I can use a simple formulae.
I can generate and describe linear number sequences.
I can find pairs of numbers that satisfy an equation with two unknowns.
Ican enumerate possibilities of combinations of two variables.

## Measuremen

- I can use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation of up to 3 decimal places.
I can convert between miles and kilometres.
I recognise that shapes with the same areas can have different perimeters and vice versa.
I can calculate the area of parallelograms and triangles.
- I recognise when it is possible to use the formulae for the area of shapes. I can calculate, estimate and compare volume of cubes and cuboids, using tandard units.
- Irecognise when it is possible to use the formulae for the volume of shapes. can solve problems involving the calculation and conversion of units of measure, using decimal notation up to 3 decimal places where appropriate.

## Geometry - properties of shapes

I can compare and classify geometric shapes based on the properties and sizes.

- I can describe simple 3D shapes.
- I can draw 2D shapes given dimensions and angles.
- I recognise and build simple 3D shapes, including making nets.
- I can find unknown angles in any triangles, quadrilaterals and regular polygons

I recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.
I can illustrate and name parts of circles, including radius, diameter and circumference.
I know the diameter is twice the radius.

## Geometry - position and direction

can draw and translate simple shapes on the co-ordinate plane, and reflect them in the axes.

- I can describe positions on the full co-ordinate grid (all four quadrants).

## Statistics

I can interpret and construct pie charts and line graphs and use these to solve problems
I can calculate and interpret the mean as an average.
