Mr Callaway and Miss Ramsey go to Pizza Hut and share a pizza. Mr Callaway cut his pizza in two pieces, which were the same size. Miss Ramsey cut her pizza into 4 equal pieces. Using the circles below, show how they cut their pizzas and tell me the fractions they made. A good idea would be to use paper circles to fold and cut – this might help you.

Miss Ramsey eats two of her slices, and Mr Callaway only eats one. He thinks he has eaten less. Using the drawings of the pizzas, explain if you think he is right or wrong.
