

Organise the coins on your table into pence and pounds.  
Can you name each coin?

Write down the value of each coin.

### Challenge Question:

You will need to think about what different coins can be equivalent to. This is a super tricky challenge so don't worry if you find it hard. Here is a starting point for you  $\rightarrow 2p + 2p = 4p$  because  $2 + 2 = 4$ .  $1p + 1p + 1p + 1p = 4p$  because  $1 + 1 + 1 + 1 = 4$ .

Match the cards with equal values.
