Lulu   Elliott

Lulu and Elliott each have a cake of the same size.
They each cut their cake into 4 equal pieces.
Lulu eats 2 pieces.
Elliott eats 3 pieces.
Who eats more cake?

On the next page, you will find picture of the cakes. You may wish to colour these in or print and cut them out to help you solve the problem.

Think about - how many slices would they eat? What would this be as a _fraction_?

Would this be the same amount of cake if the slices are the same size?

Ch: can you write an explanation to tell me why you think you're right?

Now, complete the worksheet on Showbie.

Lulu's Cake

Elliott's cake.
